
Spore

Posted by OhDearMoshe - 2008/07/30 13:30

Anyone played the creature creator demo yet? Anyone looking forward to this epic game that has been in development for so long. I can't help but really look forward to it.

I for one am looking forward to it. Come September I will also have my student loans and am putting away a tenner a week for a gaming fund.

But yeah, anyone used the creature creator? Got any cool creatures to show off?

Its PC only as far as I know. The demo itself doesn't take much spec to run though.

Heres the spore website for anyone who is interested. Go take a look and grab the demo if you haven't already tried it.

Once I get a new laptop that can actually run it I will most definitely be getting this.

Frankly, I think based on all the hype I'll probably get the full game but the creature creator looks sort of pointless to me and it really doesn't give me a sense of excitement or anticipation for the game to be released - it kind of makes the game look a bit cheap to me.

Like I said, I'll get it regardless, but I'm not too excited for it. (Or at least not excited enough to pay \$10 for the creature creator.)

I think it looks like a waste of time.

Pfft, waste of time? This game is going to be awesome!
The creature creator is great. My only critic for now is that there are too many people who give their creatures wangs!
